Subject: FWP Followup Items -- Fish and Wildlife Admin

Paul –

Attached are the follow-up documents (see below) requested during your division overview. Christina asked that we be prepared to report back to the committee on Tuesday morning prior to their taking executive action.

Christina, we'll have 10 copies of each 3-hole punched with us – unless you want to provide them copies before Tuesday. *I'm sending this same email to you multiple times – one for each division – so the email system doesn't get bogged down with all the attachments. Fisheries and Enforcement will be coming tomorrow.* Thanks for all your help.

**Senator Keane** -- How much are we spending for rent and janitorial services (maintenance) at Helena locations, i.e. Main office, Custer Avenue, Montana Wild, etc. **Attached.** Who do we lease the Helena airport hangar from? **FWP owns the hangar and leases the property from the Helena Airport.** What is the cost? **\$9,578/year.** Does the lease include maintenance costs? **No. Our pilot takes care of the janitor duties.**

**Senator Rosendale** – How do we issue game damage permits? How much do we spend on game damage supplies and materials? (Senator Rosendale) **Ken- he wanted to know the policy, procedures and criteria for participation for both game damage assistance and game damage hunts. Attached.**

**Representative Whitford** wants to know:

- 1) the resident and nonresident price for every hunting and fishing license we sell; **Attached**
- 2) the number of resident and nonresident licenses sold for each license on a statewide basis; **Attached**
- 3) the number of resident and nonresident licenses for each license we sell by FWP Region. **A report by county is attached.**

# GAME DAMAGE PROGRAM

## Policies and Guidelines

(January 5, 2007)

The game damage program is a collaborative approach designed as an equitable, consistent, and cost-effective way to minimize property damage caused by game animals. Emphasis is on public hunting during the general hunting season as the primary method to accomplish long-term solutions, recognizing that game management is responsibility shared by landowners, hunters, and the Montana Fish, Wildlife, & Parks.

### ELIGIBILITY

MCA 87-1-225 states: "(1) Subject to the provisions of subsection (2), a landowner is eligible for game damage assistance under subsection (3) if he:

- (a) allows public hunting during established hunting seasons; or
- (b) does not significantly reduce public hunting through imposed restrictions.

(2) The department may provide game damage assistance when public hunting on a landowner's property has been denied because of unique or special circumstances that have rendered public hunting inappropriate.

(3) Within 48 hours after receiving a request or complaint from any landholder or person in possession and having charge of any land in the state that wild animals of the state, protected by the fish and game laws and regulations, are doing damage to the property or crops thereon, the department shall investigate and arrange to study the situation with respect to damage and depredation. The department may then decide to open a special season on the game or, if the special season method be not feasible, the department may destroy the animals causing the damage. The department may authorize and grant the holders of said property permission to kill or destroy a specified number of the animals causing the damage. No wild ferocious animal damaging property or endangering life shall be covered by this section."

ARM 12.9.803 PUBLIC HUNTING ELIGIBILITY REQUIREMENT (1) To qualify for game damage assistance in accordance with 87-1-225, MCA, a landowner must allow public hunting or not significantly reduce public hunting through imposed restrictions during established hunting seasons, including the general big game season. The department shall make determinations of eligibility based on the criteria set out in this rule. For eligibility, public hunting must be allowed at levels and in ways sufficient to effectively aid in management of area game populations.

Restrictions that may significantly restrict public hunting include:

- (a) species or sex of animals hunters are allowed to hunt;
- (b) portion of land open to hunting;
- (c) time period land is open to hunting;
- (d) fees charged; or
- (e) other restrictions that render harvestable animals inaccessible.

(2) The department may provide game damage assistance when unique or special circumstances render public hunting inappropriate.

Policy Note 1. Producers reporting damage who do not allow hunting for legitimate safety reasons or do not have the animals on their property during the general season may be eligible based on review by the field warden, biologist and program managers. The decision to assist and circumstances will be noted on the Game Damage Eligibility Form.

Policy Note 2. Those not eligible for assistance include:

- \* Producers with complaint unsubstantiated by FWP field investigation;
- \* Producers who do not meet public hunting criteria outlined in ARM 12.9.803;
- \* Homeowners in subdivisions or locations where primary land use does not involve agricultural crop or livestock production; In these instances, regional personnel will advise landowners about techniques for reducing or addressing damage situations. Literature will be made available to these landowners, but no damage materials, herders, hunters, or kill permits will be provided.

**DAMAGE DEFINITION:** "Damage to property and crops" is defined as "damage to real property or cultivated agricultural crops." Wildlife presence on, or consumption of, non-cultivated grass or pastureland does not constitute damage qualifying for assistance under this program. In exceptional circumstances, FWP Regional Supervisor may authorize assistance in the form of hazing, dispersal devices, special hunts, kill permits, or game damage supplemental licenses when large numbers of ungulates are concentrated for extended periods on areas of pastureland reserved for future livestock consumption. Such action may be taken only if affected landowner meets all other eligibility criteria for game damage assistance."

## GENERAL RESPONSIBILITIES

1. **Regional Responsibility** Each region shall designate one person who will have primary responsibility for monitoring the regional game damage program. This person shall be known as the Game Damage Program Coordinator. In the regions, game damage will be a cooperative approach involving the area warden, area biologist, game damage coordinator, warden captain and wildlife program manager. Wardens and biologists share responsibility for receiving and responding to wildlife damage complaints. That responsibility includes all facets of response including contact, completing and filing game damage report forms, arranging for and in some cases, delivering materials, maintaining contact with other local field personnel, and forwarding recommendations concerning actions or denial to regional program managers. The regional supervisor is ultimately responsible for determining the course of action to be taken on game damage complaints when biologists and wardens cannot agree. During Commission-sanctioned hunting seasons, hunters are the primary control measure and appropriate response to game damage complaints, whenever possible.

2. **Reports** Game Damage Reports must be completed for all formal game damage complaints for all species. Those forms will be completed and filed with the regional game damage coordinator in a timely manner.
3. **Response Time** State statute 87-1-225 requires the department to respond to damage complaints within 48 hours.
4. **Investigations** On-site field investigations will be initiated when necessary to verify the complaint. On-site visits may not always be required, such as when the individual receiving the complaint is familiar with the complainant's circumstances and can attest to their accuracy or the department has an established history with the landowner.
5. **Denial of Assistance** Statute establishes specific eligibility standards for receiving game damage assistance from the department. If a landowner does not meet the standards, the request will be denied. Denials of formal requests for assistance will be documented in writing using the Game Damage Assistance Denial Form, requiring an explanation of the reason for denial and the signature of the Regional Supervisor for completion. Any denials will be communicated as soon as possible to the Field Services Office and to the Deputy of Field Operations at the Director's Office.
6. **Appeal Process** A landowner may appeal the denial or discontinuance of assistance to the Director of Fish, Wildlife, & Parks. The appeal must be in writing and contain specific reasons why the Regional Supervisor's decision is felt to be in error. The appeal must be filed within 10 days of receipt of a denial or discontinuance notification.

The FWP Director will review the information used by the Regional Supervisor in making the denial or discontinuance determination and the reasons cited by the landowner in the appeal. At the Director's discretion, the FWP Commission may be asked to review the appeal and make recommendations for the decision. Following the review, the Director will render a final decision.

7. **Methods of Assistance** Field personnel should respond quickly and effectively to game damage situations, employing game damage abatement activities on a progressive scale of intensity, from the least dangerous or harmful to the wildlife doing damage up to and including lethal methods such as damage hunts and kill permits. There may be times when it is necessary or appropriate to escalate damage actions immediately to hunts or kill permits. Whenever animals need to be taken, it is preferable to use hunters under provisions of a damage hunt. However, damage hunts may not always be an option. Generally speaking, the progressive steps for the use of game damage techniques are:

(1) Repellants such as Magic Circle;

- (2) Dispersal through the use of noisemakers and repellants, or other activities agreed upon which would serve to haze animals away from an area;
- (3) Physical barriers such as snow fence, mesh wire, panels, permanent stackyards or electric fence used to protect harvested, stored crops; fence barriers will not be provided for protection of unharvested crops standing in the field;
- (4) Damage hunts during the periods of August 15th to the opening of fall Commission-established seasons and from the close of fall Commission-established seasons through February 15th;
- (5) Kill permits used by landowners or, in rare instances, department person.

## KILL PERMITS

1. Kill permits will be reviewed, signed and issued by the Regional Supervisor or designee. Kill permits will not be used if public hunting is a viable option.
2. Kill permits will be delivered to the landowners to whom they are issued. Also a copy of this section of the *Procedures and Guidelines* will be given the landowner so that he/she completely understands what is expected of the landowner and the department.
3. Individual authorized by the kill permit to dispatch animals shall be responsible for field-dressing and providing proper care of animal carcasses prior to FWP staff taking possession of dead animals.
4. Responsibility for the disposition of animals taken by kill permits will be shared by both biologists and wardens, who will also be responsible for ensuring that any animals taken are given proper care and delivered to the appropriate social service organization.
5. In situations involving haystack damage, kill permits or damage hunts may be utilized only if the use of fencing or other barriers is not an option. The landowner must also be informed that the department may require that a stackyard or other structure must be installed in the future to address the damage problems in order for the department to continue offering assistance.
6. Landowners who are issued kill permits may be instructed to dispatch a certain number of animals per day in order to facilitate effective control measures. In all cases, the specified total number of animals to be taken, gender (if specified), and total number of animals taken daily will appear in writing on the kill permit.
7. Except in unusual circumstances, kill permits shall be used only by the landowner to whom permit is issued, a department-approved agent, family member or employee of the landowner.
8. Department personnel will take animals under the authority of a kill permit only under special circumstances, such as the landowner's physical inability to dispatch the animals himself or when department personnel can more effectively accomplish the task.
9. Except in extraordinary circumstances, and only by approval of the Regional Supervisor, kill permits for elk, antelope, and deer will not be issued between **April 1 through July 31.**

## SUPPLEMENTAL GAME DAMAGE LICENSES

1. Supplemental game damage licenses will be considered a game damage abatement method equivalent to kill permits. The Regional Supervisor, or designee, must approve issuance of supplemental game damage licenses. Approval will include specification of the number, type, time period, and area where licenses are valid.
2. Any recommendation for issuance of game damage supplemental licenses will be documented using a Game Damage Complaint Form, explaining the circumstances of the damage situation and rationale for recommendation.
3. The area FWP Commissioner, Wildlife Management Bureau Chief, and Helena Field Services office will be notified when any supplemental game damage licenses are approved for issuance.
4. Supplemental game damage licenses will only be issued from FWP regional and area offices, unless the Regional Supervisor designates specific regional staff members to issue supplemental game damage licenses in a field environment.
5. Landowners wishing to designate resident recipients of game damage supplemental licenses must utilize a form supplied by the department which provides the name, mailing address, and phone number of all designated hunters. Completed, signed forms must be delivered, either in person or by mail, to the FWP regional or area office, local biologist, or local game warden in the region where the game damage is occurring.
6. The Deer B, Antelope, and A-7 license forms which are currently used for special drawings, duplicates, etc. should be used when issuing supplemental game damage licenses. The license should be annotated to indicate property where license is valid, i.e. "Valid only on Smith Ranch," and time period when license is valid, i.e. "Valid Only from October 1 – 10, 2002. Regional staff issuing the license must obtain the appropriate LPT code number from Harvest Survey/Special License staff.
7. Copies of all licenses issued should be remitted, with license fees, as off-line issues on the internal provider remittance form.

## MATERIALS AND EQUIPMENT

1. Stackyard panels or other structural materials provided to landowners to temporarily remedy damage to haystacks remain the property of the department. If a permanent stackyard is constructed on a landowner's property, any panels or temporary fencing materials which had previously been provided by the department will be recovered by field personnel and stored for use at other sites. Regional responsibility will include a system that ensures accountability for materials. The landowner is responsible for properly storing and caring for all materials when they are not in use. Landowners who receive materials and who fail to use them for the purpose for which they were intended may be denied or limited in further assistance offered by the department. Documentation of a landowner's failure to meet these requirements must accompany the Game Damage Assistance Denial Form.
2. When providing fencing materials or stackyard panels, field personnel will inform landowners that it is their responsibility to maintain and care for these materials. Materials which are misused or not cared for will not be replaced by the department.
3. Stackyard materials will be allocated to eligible landowners through a process whereby requests from field personnel are submitted to the regional office and prioritized, with decisions on allocation of permanent stackyard material made by Regional Supervisors or designee. Requests must include the size, number and cost of the proposed stackyard(s) as well as any extenuating circumstances which may require or justify deviation from regional standards.
4. Qualifying landowners will receive materials to build stackyards based on a standard set of specifications developed by the region or on agreement between the department and the landowners. In some cases where the size or expense of a proposed stackyard or stackyards exceeds the standards, the landowner may be asked to share material costs.
5. When the department supplies materials, it is the landowner's responsibility to provide the labor necessary to erect and maintain a stackyard. Department personnel should consider the possibility of arranging labor donated by local sportsmen's groups.
6. Equipment such as scare guns, propane tanks, crackershell guns, etc. is department property. Equipment loans must be documented in writing and the equipment returned to the department after use by the landowner.

## GAME DAMAGE HUNT RESPONSIBILITIES

Damage hunts will be used as a control method within statutory and policy guidelines for selection of hunters, planning and implementation (see 87-1-225 MCA and 12.9.803 ARM). Early, late or damage hunts may only take place between August 15th and February 15th.

In situations where a damage hunt is being considered the local warden and biologist must concur on this course of action. Agreement between the warden and the biologist will have taken place before making the proposal to the regional office. If there is a disagreement at the field level, the regional supervisor will make the decision on the course of action after conferring with regional program managers.

The following protocol will be used for conducting game damage hunts:

1. In situations where there is a potential for a damage hunt to be the method of choice to address a game damage problem, a person designated by the Regional Supervisor will take the lead in investigating the complaint.
2. A FWP commissioner must pre-approve the hunt. Contact with the appropriate Commissioner will normally be made by the Regional Supervisor unless regional policy specifies otherwise. The Wildlife Bureau Chief and Field Services Office will also be notified prior to initiation of a damage hunt.
3. Regional policy will determine who is responsible for developing the legal notice, maps, and cover letter for the hunt packet.
4. Office staff, Regional Supervisor, wildlife manager, and warden captain will be kept informed of all game damage hunts. Office staff will assist in mailings and the distribution of legal documents and legal notices, as specified by regional policy.
5. Staff coordinating the hunt shall maintain communication during all phases of this process. Roles can be switched among individuals as long as all work involved with the hunts is completed. Role responsibilities should be focused primarily on ensuring that the region completes game damage commitments in a timely fashion and in compliance with statutes, rules, policies and the immediate needs of the situation.
6. *Multi-district damage hunts* may be utilized in areas where game damage problems have historically taken place and are anticipated to reoccur, as approved by the appropriate Commissioner.

## HERDERS

1. Herders may be contracted to haze animals to protect private lands. Herders may not be used to haze animals on public lands. Local biologists or wardens will prepare hire forms, oversee the herding activities, and maintain contact with the herder to ensure compliance with all terms of the work agreement.
2. Herders will be hired as seasonal staff members of the department, with all necessary personnel hire forms completed and submitted to the appropriate Helena office prior to work actually beginning. Forms must contain all requested information and fully identify tasks to be completed by the herder.
3. Herding agreements are to be of limited duration and should be negotiated for no more than the expected time needed for herding. It is the responsibility of the local department liaison to track herder time, to collect and submit herding bills and oversee compliance with tasks outlined in the agreement. Extensions beyond the time and amount negotiated in the original agreement can be made only with the prior approval of the Regional Supervisor.

## Subchapter 8

## Damage Hunts

12.9.801 DAMAGE HUNTS (REPEALED) (History: 87-1-225, MCA; IMP, 87-1-225, MCA; NEW, 1991 MAR p. 815, Eff. 5/31/91; AMD, 1999 MAR p. 1297, Eff. 6/18/99; REP, 2006 MAR p. 1867, Eff. 7/28/06.)

12.9.802 GAME DAMAGE (1) By law, the Department of Fish, Wildlife and Parks is required to respond to all big game damage complaints. General hunting seasons are the primary tool to deal with animals causing or having the potential to cause game damage. Landowners who allow public hunting and do not impose restrictions that significantly reduce public hunting qualify for game damage assistance.

(2) The department investigates damage complaints and arranges to study the situation as soon as possible, and within 48 hours of the filing of the complaint. If the department person who received the complaint is unable to respond within 48 hours, he will immediately refer the complaint to the nearest department employee who can respond within a 48-hour period. Exceptions may be made if complainant is agreeable to a longer waiting period.

(3) The department investigates all damage complaints under this policy with the exception of (4). A phone call or on-site visit constitutes an immediate response under this provision.

(4) Damage caused by nongame, furbearing, or federally listed threatened and endangered species is not covered by this policy, but is addressed on a case-by-case basis.

(5) In response to damage complaints qualifying for assistance under 87-1-225, MCA, and ARM 12.9.803, a regional supervisor may address the problem in the following ways:

- (a) by herding as a temporary measure;
- (b) by employing a variety of animal dispersal methods, such as airplanes, snowmobiles, cracker shells, and scareguns;
- (c) by using repellents as temporary solutions;
- (d) by using fencing options if the problem is chronic and involves haystacks and other stored crops;
- (e) by authorizing kill permits;
- (f) the department, through the regional supervisor or designated staff, has the discretion to issue supplemental game damage licenses for antlerless animals to hunters as an alternative to a kill permit being issued to a landowner. Supplemental game damage licenses administrative procedures are outlined in ARM 12.9.805;
- (g) damage hunts may be used to address site-specific damage problems in accordance with ARM 12.9.804;
- (h) netting or mechanical devices may be used to reduce tree damage; and

(i) archery, shotgun, muzzle loader weapons, or other weapons may be used as an alternative hunting method when rifle hunting poses a threat to the safety and welfare of persons or property.

(6) Assistance may be denied or discontinued to a landowner who:

(a) creates or further contributes to game damage problems by not providing sufficient public hunting to aid in reduction of game populations;

(b) imposes other restrictions which prevent adequate harvests; or

(c) refuses reasonable suggestions, actions or remedies offered by the department. The decision to deny or terminate assistance will be made by the regional supervisor. Denial or discontinuance of assistance will be documented with the reasons, history and other pertinent information used to make that decision. A copy of the written decision will be provided to the landowner. The written decision will explain appeal rights.

(7) A landowner may appeal the denial or discontinuance of assistance to the director of the department. The appeal must be in writing and must contain specific reasons why the regional supervisor's decision is felt to be erroneous. The appeal must be filed within ten days following receipt of a denial or discontinuance determination from the regional supervisor.

(a) The director of the department will review the information used by the regional supervisor in making the initial determination and the reasons cited by the landowner for appealing the decision. At the director's discretion, the commission may be asked to review the appeal and make recommendations for the decision. Following the review, a final decision will be rendered by the director. (History: 87-1-225, MCA; IMP, 87-1-225, MCA; NEW, 1991 MAR p. 815, Eff. 5/31/91; AMD, 2002 MAR p. 1306, Eff. 4/26/02; AMD, 2006 MAR p. 1867, Eff. 7/28/06.)

12.9.803 PUBLIC HUNTING ELIGIBILITY REQUIREMENT (1) To qualify for game damage assistance in accordance with 87-1-225, MCA, a landowner must allow public hunting or not significantly reduce public hunting through imposed restrictions during established hunting seasons, including the general big game season. The department shall make determinations of eligibility based on the criteria set out in this rule. For eligibility, public hunting must be allowed at levels and in ways sufficient to effectively aid in management of area game populations. Restrictions that may significantly restrict public hunting include:

- (a) species or sex of animals hunters are allowed to hunt;
  - (b) portion of land open to hunting;
  - (c) time period land is open to hunting;
  - (d) fees charged; or
  - (e) other restrictions that render harvestable animals inaccessible.
- (2) The department may provide game damage assistance when unique or special circumstances render public hunting inappropriate. (History: 87-1-225, MCA; IMP, 87-1-225, MCA; NEW, 2006 MAR p. 1867, Eff. 7/28/06.)

12.9.804 GAME DAMAGE HUNTS (1) Damage hunts are carried out according to the following policies and procedures:

(a) during the season-setting process, the department requests that the commission tentatively approve a specified number of antlerless deer, antlerless elk, and doe/fawn antelope licenses for potential game damage occurring between August 15 and February 15; and

(b) if the regional supervisor determines that a damage hunt is necessary before, during, or after the general hunting season, the regional supervisor must obtain approval of the commissioner in whose district the game damage hunt is proposed prior to implementing the hunt. If the commissioner is not available, then the regional supervisor may request approval from the chairman of the commission or, in his absence, any other commissioner.

- (2) The following conditions apply to game damage hunts:
- (a) damage hunts may only occur between August 15 and February 15;
  - (b) damage hunts may be authorized when there are enough animals involved on the landowner's property to justify the use of public hunting, but numbers of animals and size of affected area does not qualify for implementation of a management season, as outlined in ARM 12.9.1101;
  - (c) damage hunts may be authorized when hunting will occur only on property where public hunting during the general season qualifies the property for game damage assistance under 87-1-225, MCA, and ARM 12.9.803 and on approved adjacent or nearby legally-accessible state or federal land;
  - (d) damage hunts may be authorized when the game damage is a recurring problem and animals causing the problem are normally unavailable during the general hunting season;
  - (e) a game damage hunt roster must be established in accordance with ARM 12.9.804A for use in identifying hunters eligible to participate in game damage hunts. If sufficient eligible hunters cannot be identified through the game damage hunt roster, the department may identify eligible hunters through other established means of hunter selection, including first-come, first-serve advertised opportunities and unsuccessful special permit applicant lists;
  - (f) unless stated otherwise, participants in a damage hunt shall possess a valid unused license, permit, or damage hunt permit for the species being hunted;
  - (g) a person who is contacted by the department for the purpose of a damage hunt may waive the opportunity to participate, but may not be considered again until all other interested persons have been contacted;
  - (h) any weapons restrictions or area closures that apply during general hunting seasons to areas included in game damage hunts will also apply to hunting conducted during game damage hunts in those same areas; and
  - (i) damage hunts may include the harvest of male and female game animals.
- (History: 87-1-225, MCA; IMP, 87-1-225, MCA; NEW, 2006 MAR p. 1867, Eff. 7/28/06.)

12.9.804A GAME DAMAGE HUNT ROSTER (1) A game damage hunt roster will be used to provide a list of hunters available to participate in game damage hunts and management seasons, according to the following procedures:

- (a) hunters interested in participating in game damage hunts and management seasons will apply through the department web site between June 15 and July 15 annually. A roster will be established through a computerized random selection of applicant names, with roster results being made available on-line by August 1 annually. Hunters without internet access may apply at any department regional or Helena office between June 15 and July 15 annually. If necessary, the department may establish additional sign-up periods;
- (b) hunters may apply only for one antelope hunting district, one deer hunting district, and one elk hunting district;

(c) resident and nonresident hunters must possess a valid unused antelope, deer, or elk license specific to the species being hunted to participate in a game damage hunt or management season; and

(d) nonresident hunters who possess a valid unused antelope, deer, or elk license may comprise up to 10% of the total game damage hunt roster pool of hunters for a specific game damage hunt or management season.

(2) If sufficient hunters to participate in a game damage hunt or management season for a hunting district cannot be identified from that district's game damage hunt roster, hunters on the roster from an adjacent hunting district may be selected.

(History: 87-1-225, MCA; IMP, 87-1-225, MCA; NEW, 2006 MAR p. 1867, Eff. 7/28/06.)

12.9.805 SUPPLEMENTAL GAME DAMAGE LICENSES (1) To assist landowners who qualify for game damage assistance under the provisions of 87-1-225, MCA, the department, through the regional supervisor or designated staff, has the discretion to issue supplemental game damage licenses for antlerless animals to hunters for game management purposes or as an alternative to a kill permit being issued to a landowner. Criteria used to determine when to issue a supplemental game damage license may include, but are not limited to, the following:

(a) the number of animals to be killed does not exceed 12;

(b) the animals causing the damage are present on the property during legal hunting hours;

(c) the circumstances make a game damage hunt under ARM 12.9.801 impractical;

(d) hunting is likely to be an effective way to remove animals causing damage;

(e) damage to be addressed occurs between August 15 and February 15, in accordance with ARM 12.9.801(1);

(f) each hunter will have sufficient opportunity to utilize licenses; and

(g) proposed harvest is consistent with regional wildlife management objectives.

(2) The department will specify the number of licenses to be issued, the species to be hunted, the time period in which the license may be lawfully used, and the property where the licenses may be used. The time period for which a supplemental game damage license is issued may be extended by the department. If continued damage requires harvest of additional animals, the department may issue additional supplemental game damage licenses upon approval by the regional supervisor.

(3) When the department authorizes the use of a supplemental game damage license, the landowner experiencing the game damage, subject to the provisions of 87-2-520, MCA, may designate some or all of the resident hunters to receive the supplemental game damage licenses by mailing or delivering in person a list of names with associated mailing addresses and phone numbers on a signed form provided by the department, to the department regional office, local biologist, or local game warden in the region where the game damage is occurring.

(4) When the department must designate resident or nonresident supplemental game damage license recipients, selection will be made using procedures defined in ARM 12.9.801(1)(b)(ii) through (iv).

(5) In order to receive an elk supplemental game damage license, a hunter must surrender to the department any unused valid elk license and special elk permit, if applicable, prior to the supplemental elk game damage license being issued.

(a) If the hunter surrenders to the department an unused valid elk license, there will be no charge for the elk supplemental game damage license and no refund will be issued for the surrendered license and permit. If the hunter has not purchased an elk license, the price will be the regular license price or an adjusted price set by the commission; and

(b) The department may only issue an elk supplemental game damage license to a nonresident who holds and surrenders a valid, unused B-10 elk license and special elk permit, if applicable. The department will not charge for the elk supplemental game damage license and no refund will be issued for the surrendered license and permit.

(6) Hunters hunting with supplemental game damage licenses are subject to Montana hunting laws and regulations.

(7) Regional supervisor will notify the commissioner in whose district damage is occurring whenever supplemental game damage licenses are authorized for issuance. (History: 87-2-520, MCA; IMP, 87-2-520, MCA; NEW, 2002 MAR p. 1306, Eff. 4/26/02.)
